Flexibility and Productivity

SLP Central Mix Plants

CON-E-CO custom-engineers each plant to suit your high-production requirements. Options include:

- Wet/dry alleys
- Materials handling systems designed to adapt to site obstructions
- Low profile for reduced height
- Designed to site space requirements and limitations
- Compact designs to reduce building enclosure costs
- Large, double-wall split rectangular or round silos
- CON-E-CO recirculating patented style or gravity feed cement batcher
- Aggregate bins up to 400 cubic yards
- Available with oversized aggregate batcher for 12-yard mix design flexibility
- Central or individual dust control systems
- Mixer-charging conveyor belts from 36" to 54"
- State-of-the-art 12-cubic-yard mixer
- Custom-designed work platform and ladder access
- Many other production-enhancing options available
